• Bridges

Nanobase Global Consortium (“NGC”) has world renowned roads, seaports, and airport design and construction companies as its premier members. NGC offers decades of experience in constructing highways, Freeways, Sea Ports, and Air Ports in more than 20 countries around the world.

NGC employs proven methodologies in managing construction process effectively and efficiently. NGC members collaborate and integrate work process to deliver outstanding project completion.

NGC reshaped the history of roads and ports building utilizing the KNOW-HOWs:

- Constructing support facilities including fueling and heavy water treatment facilities
- Civil works including runways, taxiways and aprons
- Building state-of-the-art passenger terminal and control tower
- Green and power-saving technology
- Construction project financing
- Integrate and access infrastructures including roads and bridges
